

CONNECTED

Competitive data rates
Multi-IMSI global connectivity
190+ countries, 650+ networks
No "lock-in" contracts

PROTECTED

Advanced security
End-to-end encryption
Secure mobile network
Full data privacy

ENHANCED

Free bespoke portal
Custom SIM applets
Simplified deployment
Enriched insights

ZARIOT and our ecosystem partners enable secure global cellular connectivity with cost-efficient, customisable functionality for all your current & future energy needs

Smart meters

- Easy integration with current & legacy infrastructure
- Multi-carrier capabilities for 24/7 accessibility, even in the most remote areas
- Award-winning security to perform root cause analysis & threat mitigation
- In-house portal for insights & reports on device health, consumption patterns, & more

EV infrastructure

- End-to-end encryption of all data (e.g. driver information)
- Supports a broad range of cellular technologies (e.g., 5G, 4G, LTE-M, NB-IoT, 3G)
- Avoid extensive cabling costs & logistics associated with ethernet & Wi-Fi
- Stay ahead of cybersecurity & data privacy regulations (e.g., UK EV Regulations)

Environmental monitoring

- Seamlessly deploy & scale without siting restrictions
- Configure and update assets over-the-air (OTA) over entire device lifecycle
- Reduce planning & operating costs with fewer & more efficient roll outs
- Enhance worker safety with process automation & safety monitoring

Easy integration

Extensive, open APIs for seamless integration

Agile management

Multitenancy management to track, troubleshoot & react

User-friendly

Simple & intuitive user experience with prompt support

Greater control

Full ownership & operations of all core network functions

Deep insights

Real-time visibility across all devices

Extensive ecosystem

Full feature flexibility via in-house & partnership solutions
