Reliable & secure global cellular IoT connectivity helps redefine healthcare solutions, keeping patients safe & healthy while empowering providers to deliver superlative care

Remote patient monitoring

- Continuous monitoring to aid in diagnosing diseases earlier
- Analyze & detect changes in critical health parameters to enhance patient care
- Significantly reduce healthcare costs while improving treatment outcomes
- All transmitted data is protected from unauthorized access (i.e., GDPR, HIPPA compliant)

Chronic condition monitoring

- Greater patient transparency, connectedness & autonomy
- Monitor patient adherence to treatments & respond or adapt plans immediately
- Patients have access to more personalized attention to reach expected outcomes
- Reduce the risks of hospital readmissions & maintain high patient satisfaction

Equipment tracking

- Track real-time location of medical & monitoring equipment
- Reduce logistics delays, patient wait-times & equipment costs by deterring theft
- Gain visibility into pharmacy inventory control for better allocation & planning
- Improve overall productivity & quality of life across the entire healthcare industry

Easy integration

Extensive, open APIs for seamless integration

Reliable ecosystem

Full feature flexibility via in-house & partnership solutions

Customizable platform

Management platform supports multiple technologies

Greater control

Full ownership & operations of all core network functions

Fine-grained data

Real-time insights of devices improves reaction time

User-friendly

Simple & intuitive user experience with prompt support
